

1 **What Is Claimed Is**

2 1. A club-carrying apparatus including:

3 □ a bag; and

4 □ a support device including:

5 ■ two legs pivotally connected with the bag;

6 ■ two rods each including an upper end, a lower end and a
7 waist between the ends, wherein the upper end of each of the
8 rods is attached to one of the legs;

9 ■ a ferrule for binding the waists of the rods;

10 ■ a pad to which the lower ends of the rods are attached; and

11 ■ an anchor installed on the bag in order to hook the rods.

12 2. The club-carrying apparatus according to claim 1 wherein the bag
13 includes a frame attached to a lower end of the bag for
14 enhancement.

15 3. The club-carrying apparatus according to claim 2 wherein the
16 anchor is provided on the frame.

17 4. The club-carrying apparatus according to claim 3 wherein the
18 anchor is attached to the frame.

19 5. The club-carrying apparatus according to claim 3 wherein the
20 anchor is molded with the frame as one piece.

21 6. The club-carrying apparatus according to claim 5 wherein the
22 anchor is formed with two protrusions each for restraining one rod.

23 7. The club-carrying apparatus according to claim 6 wherein each
24 protrusion is away from the frame by a gap for receiving one rod.

25 8. The club-carrying apparatus according to claim 1 wherein the bag is
26 formed with two hinges for pivotally connecting the legs with the

1 bag.
